

Note the *brännvinspanna*, *hatt*, *pipor*, och *kyhlfat* – still, top end, pipes, and cooling vessel. The pipes run through the cooling vessel and empty into a *tratt* inserted into a *dryckeskagge* – funnel in a drink-keg. The cooling vessel is made of *lagg* held together with *träband* – staves wrapped with wooden bands. It stands on *fötter* – feet, and may be cooled with snow, ice or water.
